

Mentoring (Mentor and Mentee List) 2017-22

Each student in the department is assigned a mentor who supports and provides guidance for academic and personal issues. Around 20- 30 students are allotted to a mentor. Mentoring aims at relationships focused on supporting the growth and development of the mentee. The mentor may be from the same discipline. Mentor maintains close contact with the mentee and meets them at regular intervals. A mentee who needs continuous help is met with increased frequency. Mentors strive to bring out the best in the mentee. Mentor refers to the mentee for professional help as and when needed. Mentors also contact the parents of the students if needed.
